"The light has gone out of our lives
and there is darkness everywhere... "

The sea, falling back to the dark,
leaves light on the land.

To be lucid, you said once,
was what you wanted most of all.

The hands of the sea, withdrawing,
leave looped on the earth's breast
shell-fans of spray.

On the dawn of your death
the sun was lifted, red, on a red pillar,
from the sea; which it left to become
a disk of red dust on the sky's forehead.

Still everything glows.
The land is bright, the sea,
the sky, bright, everything
(but one dark gull,
flying the rim of the clouds)
shines
in no ordinary light.

Dear Sir,

The following is a summary of the results of the tests conducted on the 12th November 1944.

The test results show that the material is capable of withstanding a load of 10 tons per square foot.

To be tested, you will need to provide a sample of the material for testing.

The results of the tests will be forwarded to you as soon as they are available.

On the 12th November 1944, the test results were as follows: the test results show that the material is capable of withstanding a load of 10 tons per square foot.

Yours faithfully,
The Director of the
Department of the
Interior
London
